TABLE OF CONTENTS

GENERAL SESSIONS

	Author	Page
Cooperative research	*C. E. Cormany*	3
Patterns of cooperation in sugar beet research	*Martin G. Weiss*	7
What's new in sugar research?	*H. B. Hass*	15

AGRONOMY

FERTILITY, ROTATION AND IRRIGATION

	Author	Page
Effect of method of application of double superphosphate on the yield and phosphorus uptake by sugar beets	*W. E. Larson*	25
A study of the effect of magnesium sulfate on yield and sucrose content of sugar beets	*E. M. Holst* *C. E. Cormany*	32
Response of sugar beets to nitrogen fertilizer in the Imperial Valey, California	*B. A. Krantz* *A. J. MacKenzie*	36
The effect of fertilizer treatments upon yield and sugar content of sugar beets at Garden City, Kansas	*Carl W. Carlson* *Roy B. Herring*	42
The application of petiole analysis to sugar beet fertilization	*D. Ririe* *A. Ulrich* *F. J. Hills*	48
Anhydrous ammonia, the effect of time, rate and technique of its application in the production of sugar beets	*F. H. Leavitt* *R. L. Stier*	58
Response of yield-type versus sugar-type sugar beet varieties to soil nitrogen legels and time of harvest	*F. J. Hills* *L. M. Burtch* *D. M. Holmberg* *A. Ulrich*	64
Cropping and fertilization practices for the production of sugar beets in Western Nebraska	*H. F. Rhoades* *Lionel Harris*	71
The fertility balance in a ten-year sugar beet rotation after forty-two years of cropping	*S. Dubetz*	81
Effects of rotation on sugar beets in the Red River Valley	*J. C. Tanner*	86

TABLE OF CONTENTS (Cont.)

	Author	Page
Preliminary comparison of the effects of Leguminous and non-leguminous green manures on sugar beet production	*W. A. Williams, D. Ririe, H. L. Hall, F. J. Hills*	90
Stand and yield of sugar beets, and weed populations as affected by: broadcast fertilization, mechanical thinning, application of herbicides and their interactions	*G. J. Hogaboam, H. W. Bockstahler, Buford H. Grigsby, George W. French*	95
Irrigation and fertility studies on sugar beets at Logan, Utah	*Vaughn E. Hansen, Jay L. Haddock*	106
Sugar beet irrigation experiments in Wyoming	*W. McNab Miller, Jay R. Partridge, Carrol Tyler*	112
Progress report on irrigation experiment—Rader farm, Saginaw, Michigan	*Hal B. Reeve, Ernest H. Kidder*	120
CHEMICAL WEED CONTROL AND SOIL CONDITIONERS		
The control of annual grasses in sugar beets with Dalapon	*L. E. Warren*	124
Grass control in sugar beets with the herbicides IPC, TCA and DCU	*R. T. Nelson*	130
Pre-emergence applications of a combination of TCA and Endothal show promise for control of grassy and broadleaf weeds in sugar beets	*C. E. Cormany*	135
Results with IPC spraying in Eastern Montana	*E. G. Eckroth*	135
The use of chemical additives to control soil crusting and increase emergence of sugar beet seedlings	*Bruce L. Baird, Joseph J. Bonnemann, Arch W. Richards*	136
Influence of Krilium soil conditioner on sugar content of beets	*C. H. Smith*	143
MISCELLANEOUS		
Problems connected with high beet populations	*L. J. Holmes, Curzon Kay*	147
Estimate of space occupied proposed as a measure of sugar beet stands	*G. W. Deming*	151

TABLE OF CONTENTS (Cont.)

	Author	Page
Cultural practices related to yields and germination of sugar beet seed	*R. A. Pendleton*	157
Comparison of hand and machine thinning of sugar beets	*Albert S. Hunter* *John A. Yungen*	161
Sugar beet planting date studies in Imperial Valley, California	*Charles Price* *Don C. Fife* *B. A. Krantz*	164
Experiences with sugarbeet on land flooded by the sea	*H. Rietberg*	168
Sugar losses caused by frost defoliation	*F. H. Peto*	171
The influence of Maleic Hydrazide on bolting and yield of overwintered sugar beets in California	*D. Ririe* *L. M. Burtch* *F. J. Hills*	176

ENTOMOLOGY AND PLANT PATHOLOGY

Outbreaks of beet leafhoppers north and east of the permanent breeding areas	*J. R. Douglass*	185
Curly top moves east	*N. J. Giddings*	194
Relative curly-top resistance of sugar beet varieties in the seedling stage	*N. J. Giddings*	197
Beet leafhopper outlook statements	*Howard E. Dorst*	201
Chromatography as a method of attack on the problem of the chemical nature of resistance of sugar beets to curly top	*J. M. Fife*	207
Sugar beet virus yellows influences subsequent curly top infection	*N. J. Giddings*	212
Effect of virus yellows on the yield and sucrose percentage of the sugar beet at Salinas, California, in 1952	*J. S. McFarlane* *C. W. Bennett* *A. S. Costa*	215
Results of an experiment in Colorado to appraise effects of virus yellows in sugar beet	*G. H. Coons* *John O. Gaskill* *Leslie B. Daniels*	219
Histological changes produced by virus yellows in sugar beet leaves	*C. F. Lackey*	225
Observation and studies of virus yellows of sugar beet in California	*C. W. Bennett* *A. S. Costa*	230

TABLE OF CONTENTS (Cont.)

	Author	Page
Effect of virus yellows on yield and sucrose content of sugar beet in tests at Riverside, California	*C. W. Bennett* *Charles Price* *Glenn E. Gillespie*	236
An alternaria leaf spot of the sugar beets	*J. S. McFarlane* *Roy Bardin* *William C. Snyder*	241
Methods of inoculating sugar beets with Aphanomyces cochlioides drechs	*C. L. Schneider*	247
Correlation between sugar beet crop losses and greenhouse determinations of soil infestation by Aphanomyces cochlioides	*H. C. Fink* *W. F. Buchholtz*	252
Field trails with soil row treatment for the control of damping-off of sugar beets	*Torrey Lyons* *L. D. Leach* *F. J. Hills*	260
A comparison of several methods of testing sugar beet strains and individual roots for resistance to storage pathogens	*John O. Gaskill*	264
Identification of some materials in root exudates of nematode (Heterodera Schachtii, Schmidt) host plants	*R. R. Wood* *R. F. Serro*	271
Endrin — a new insecticide for sugar beet webworm control	*R. E. Hamman* *R. T. Nelson*	276

AGRICULTURAL ENGINEERING

LAND PREPARATION, PLANTING AND THINNING

Minimum seed bed preparation	*M. G. Frakes*	281
An improved method of applying fertilizer to sugar beets	*M. G. Frakes* *H. L. Draher*	285
Preventative weed control — methods and equipment	*John T. Maletic*	291
Planting for machine thinning	*L. A. Lohmeier*	296
Status of spring mechanization in the Michigan area	*M. C. Henderson*	299
Thinning trials in Eastern Montana	*E. G. Eckroth*	302
Spring mechanization in the Red River Valley—1953	*H. A. Tvedten*	305

TABLE OF CONTENTS (Cont.)
	Author	Page
Mechanical thinning of sugar beets in the area served by the Utah-Idaho Sugar Company	*Bion Tolman* *Ronald C. Johnson*	306
Five years' experience in complete mechanical thinning of sugar beets	*A. M. Watson* *L. H. Henderson*	309
A dynomometer for determination of the power requirements of a sugar beet thinner	*George W. French*	313
HARVEST AND RECEIVING		
Five years' mechanical harvesting experience with completely machine thinned beets	*A. M. Watson*	318
Harvesting equipment	*George W. Nixon*	320
Influence of machine harvest on receiving facilities	*Austin Armer*	324
Relationship of screening to beet population	*L. J. Holmes* *Curzon Kay*	327
Comparative efficiency of rubber and steel Rienks screens	*Charles R. Johnson*	330
End dump arrangements on old and new receiving equipment	*R. W. Brandt*	333
Beet receiving equipment	*Glen W. Yeager*	337
Improved beet sample taking with new-design pan	*Art Johnson*	340
Basic beet piler design and its application to construction	*Read A. Wilkinson* *J. G. Stone*	344
Sugar beet storage problems	*L. R. Cool*	353
Adapting the Marbeet Midget beet harvester to experimental plot harvest	*R. E. Johnson*	356
Conserving and handling beet tops	*E. L. Swift*	357
MISCELLANEOUS		
Irrigation of sugar beets	*Ivan D. Wood*	362
Equipment for beet seed treating	*L. A. Kloor*	366
Seed treating machinery	*George E. Walters*	372
Processing and testing of monogerm seed	*L. A. Kloor* *George E. Walters* *G. E. Rush* *Charles Price* *Austin Armer*	376
Field stands obtained from plantings of variously processed mono- and multi-germ sugar beet seed	*George E. Walters*	379
AUTHOR INDEX		383
